\*1) Insert sub-base code after model numbers: 04, 06, 08, 10 and 12 corresponding the stations

\*2) Add +0,25 for two further stations V60 series, +0,30 for V61 and +0,54 for V62 series

**Mounting instructions**
**Pressure shut-off part**

1. Set stopper at required position (in main pressure line).

2. Insert two bushes to lock stopper in position.

3. Mount valves on sub-base (bushes rise into P port of valves).

Extension possibilities of sub-bases

Screw torque for sub-base  
M3 = 0,7 +0,3 Nm  
M4 = 1,6 +0,5 Nm  
M5 = 3,4 +0,5 Nm  
M6 = 5,2 +0,5 Nm

**Warning**

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under »**Technical features**«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems, or other applications not within published specifications, consult NORGREN.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in pneumatic systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
